

Certificate

Hazards and Emergency Management Certificate

The undergraduate certificate in hazards and emergency management provides a program for students and professionals pursuing careers in emergency management and related hazards analysis. The certificate is an affidavit of academic proficiency and is administered by the Department of Political Science and Geography. The certificate is available to undergraduates and non-degree seeking professionals who meet the requirements. Students with comparable professional experience may be able to satisfy competencies in selected courses through prior learning assessment.

For completion of the certificate, students must have a minimum cumulative grade point average of 2.00 in all courses specified as a requirement for the certificate and complete a minimum of six hours in upper-level courses required for the certificate through courses offered by Old Dominion University.

Requirements

Students must complete the following courses:
