

Minor

Mechanical Engineering Technology Minor

The minor in mechanical engineering technology is open to students (except mechanical engineering, manufacturing engineering technology, and mechanical engineering technology majors) who have completed at least one four-credit course in calculus. It is particularly helpful for those who are preparing for the Fundamentals of Engineering examination. The courses are offered both on campus and through ODUGlobal.

Requirements

The program consists of 12 credits and the specified courses are as follows:

MET 300	Thermodynamics	3
MET 310	Dynamics	3
MET 330	Fluid Mechanics	3
MET 350	Thermal Applications	3
Total Credit Hours		12

Certain substitutions are possible if suitable justification is provided.

For completion of a minor, a student must have a minimum overall cumulative grade point average of 2.00 in all courses specified as a requirement for the minor exclusive of lower-level courses, prerequisites and corequisites and complete at least six hours in upper-level courses in the minor requirement through courses offered by Old Dominion University.
