

## Bachelor of Science

# Physics with a Major in Physics and Electrical Engineering (BS, BSEE)

The dual degree program in physics and electrical engineering is a five-year program. Students will receive a BS degree and a BSEE degree upon graduation. The dual degree program provides the highest level of preparation for both graduate school and positions in industry.

### Upper-Division General Education

The Upper-Division General Education requirement is met by the dual degree requirements.

### Requirements for Graduation

All majors for the BS degree in physics require completion of a minimum of 120 credit hours (150 credit hours for the dual degree in physics and electrical engineering and the dual degree in physics and the Master of Business Administration), which must include both a minimum of 30 credit hours overall and 12 credit hours in upper-level courses in the major program from Old Dominion University, completion of ENGL 110C, ENGL 211C or ENGL 231C, and the writing intensive (W) course in the major with a grade of C or better, and Senior Assessment. Additionally, physics majors require completion of the Physics Exit Exam with a minimum score of 20<sup>th</sup> percentile, and the astrophysics major requires completion of the Astrophysics Exit Exam with a minimum score of 20<sup>th</sup> percentile. Additional hours may be required to meet the foreign language requirement. All majors require a minimum grade of C in PHYS 261N-PHYS 262N, PHYS 231N-PHYS 232N, or

PHYS 226N-PHYS 227N. Except for the secondary physics education major, physics majors require a minimum cumulative grade point average of 2.00 overall and in the major. The secondary physics education major requires a minimum 2.75 grade point average overall, in the major, and in the professional education core, with no grade less than a C- in the major and professional education core. The professional education core satisfies the upper-level general education requirement.

## Dual Degree in Physics and Electrical Engineering

Students in this major must earn a minimum of 150 credit hours.

## BS Degree with Honors

Qualified students may receive the BS degree with honors (to be noted on their diplomas) by completing specified additional requirements. At the time of application for this designation, a student must have a GPA of 3.50 or higher in physics, a GPA of 3.25 or higher overall, must have completed two contract honors courses, and must have completed 60 credit hours (of which at least 54 must be in grade-point graded courses) at Old Dominion University. (Contract honors courses are specialized courses of individual study under the direct supervision of a professor. Permission to take these courses is granted jointly by the Department of Physics and the Honors College.)

## Degree Program Guide

The Degree Program Guide is a suggested curriculum to complete this degree program in four years. It is just one of several plans that will work and is presented only as broad guidance to students. Each student is strongly encouraged to develop a customized plan in consultation with their academic advisor. Additional information can also be found in Degree Works.

- \* Does not include the University's General Education language and culture requirement. Additional hours may be required.
- 1 ENGN 121 satisfies both the Physics Approved Seminar requirement and the PHYS Information Literacy and Research requirement in the Physics curriculum.
- 2 ECE 287 satisfies the PHYS 303 requirement in the Physics curriculum.
- 3 PHYS 425 satisfies the Nonmajor Engineering Elective requirement in the Electrical Engineering curriculum.
- 4 PHYS 453 and PHYS 456 offered spring semester only.
- 5 Electrical Engineering students need four technical elective courses selected from one of two options: (1) four 400-level ECE technical elective courses; (2) three 400-level ECE technical elective courses and one 300-level ECE technical elective course or one approved 300- or 400-level CS/MATH/Engineering course.
- 6 ENMA 480 satisfies the PHYS Philosophy & Ethics requirement in the Physics curriculum.

The General Education requirements in information literacy and research, impact of technology, and philosophy and ethics are met through the

Electrical Engineering major/degree. The upper-division General Education requirement is met through the completion of a second major/degree.

Electrical engineering majors must earn a grade of C or better in all 200-level ECE courses prior to taking the next course in the sequence.

Any ECE course registration issues are to be resolved with the ECE Academic Coordinator and Program Manager.
